

Hippopotamus

Supplies

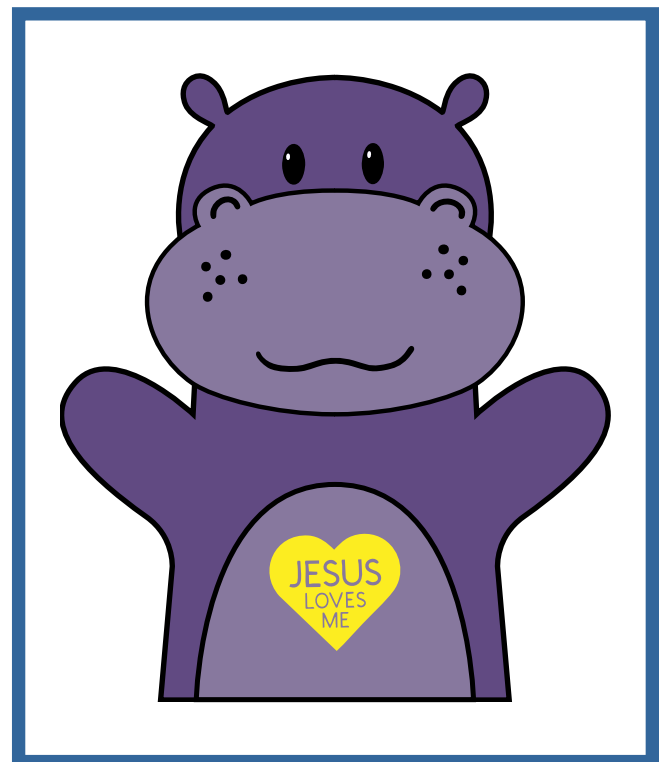

To ensure your puppet lasts, we recommend using the following supplies to construct your puppet:

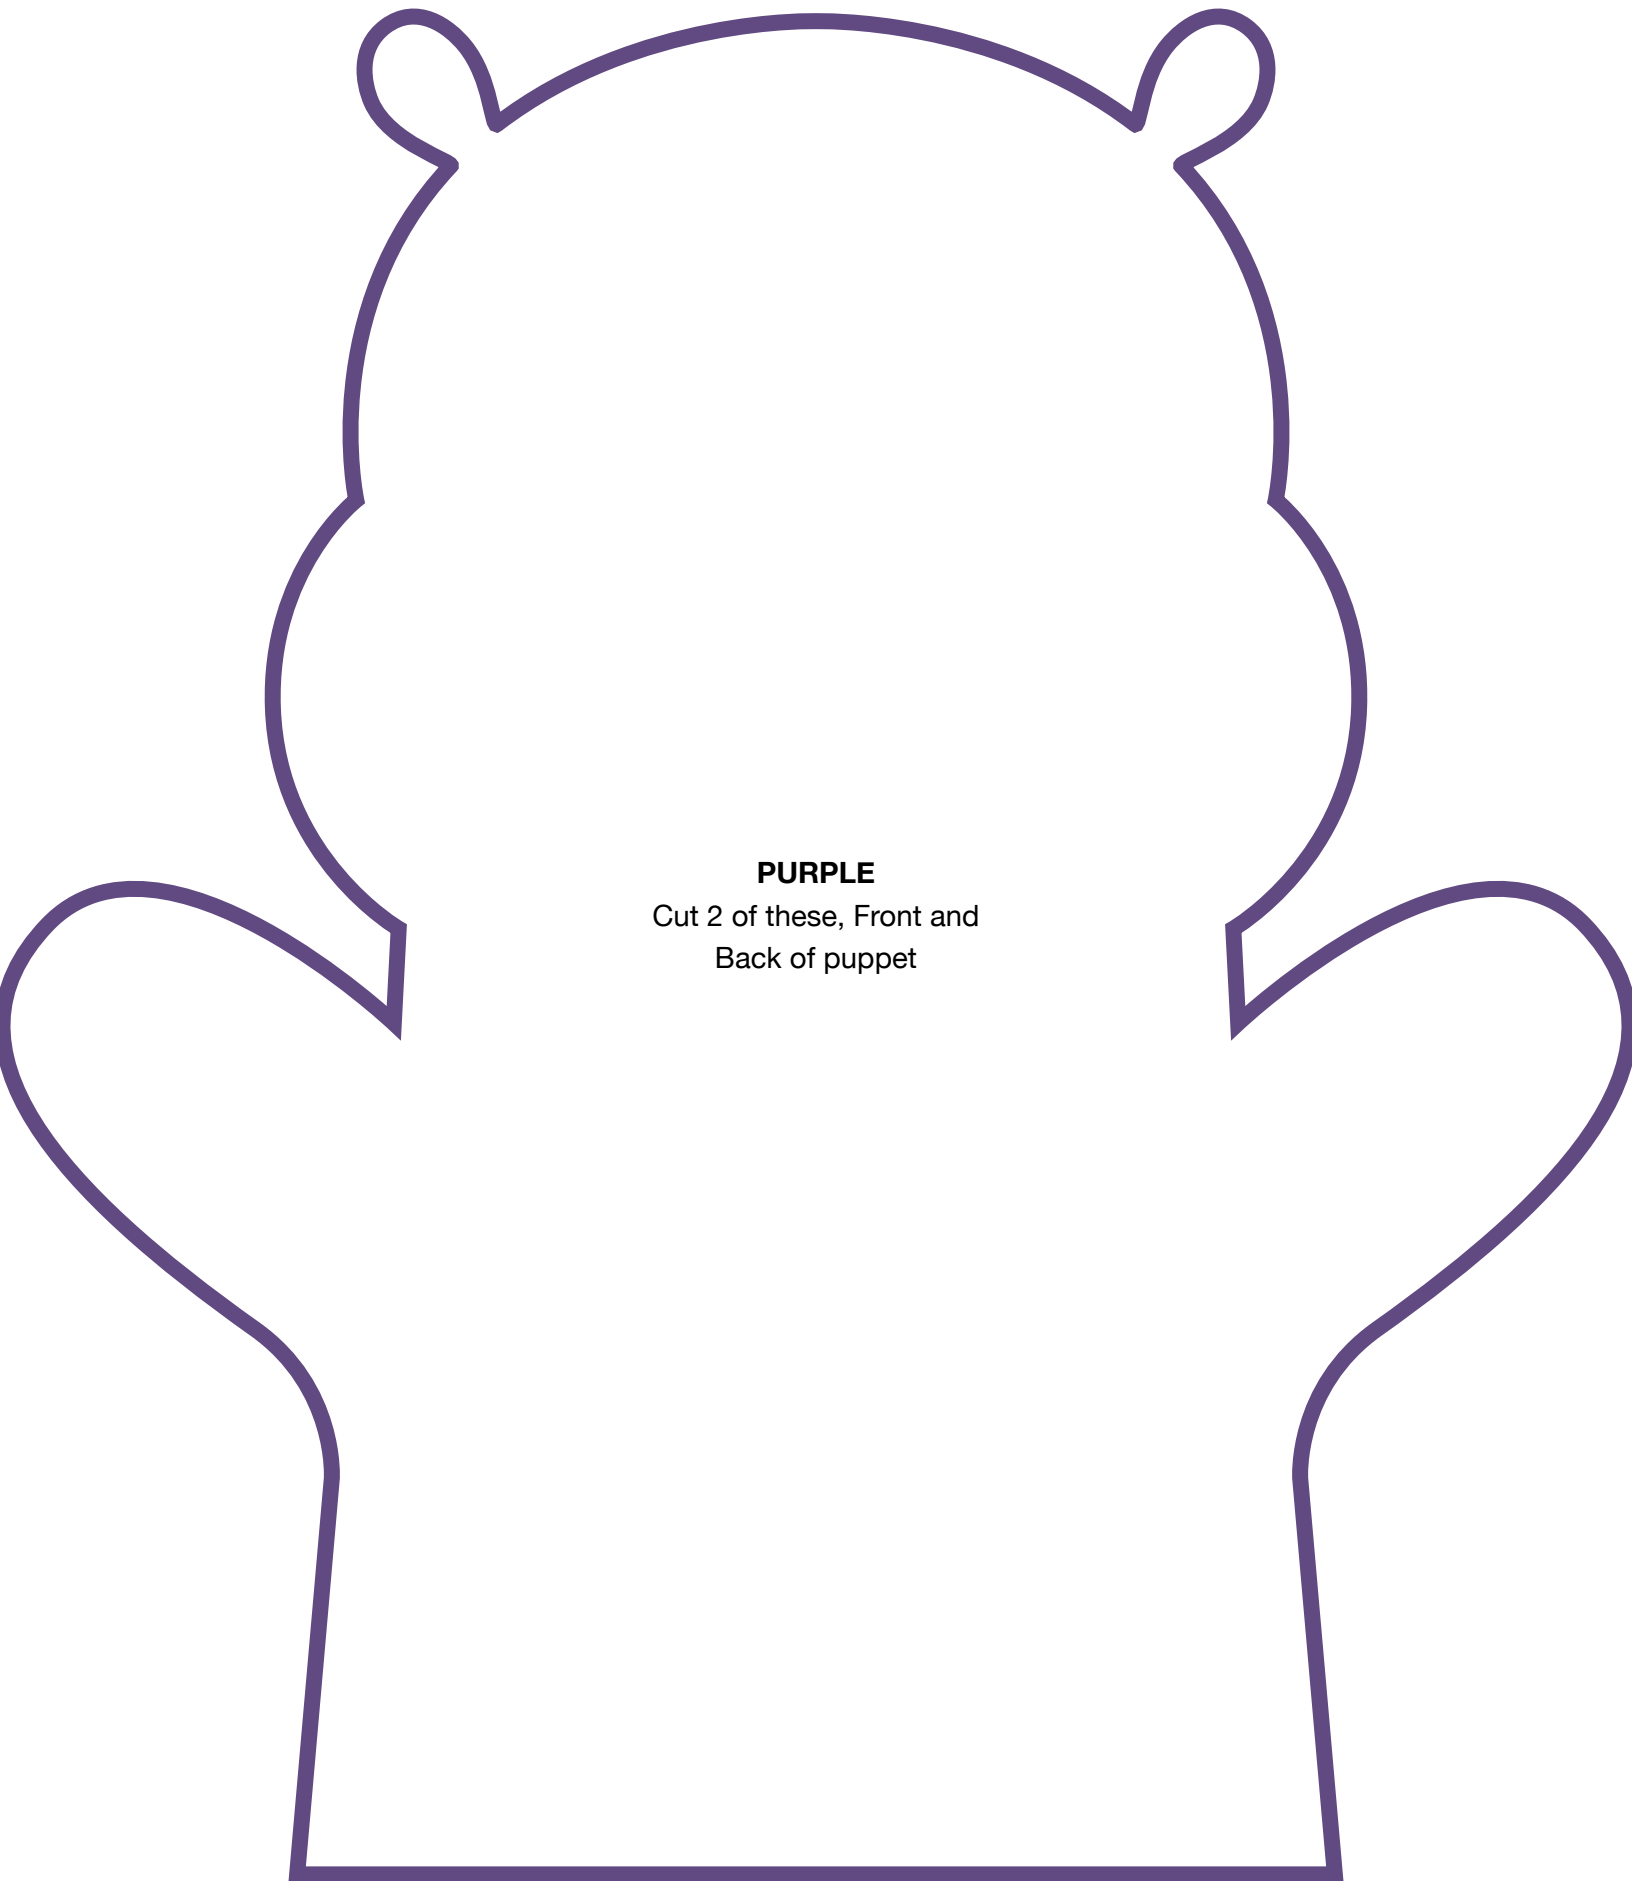

- Sewing machine
- Purple and light purple felt*
- Thread
- Hot glue
- Sharpie
- Scissors, exacto knife

* It is okay if the exact shades of colors of felt vary from the example pictured below.

Instructions

1. Trace and cut all pieces out of felt.
2. Glue the Nose and Belly pieces to the Front body piece.
3. Glue the eyeballs to the Front body piece.
4. Draw the Mouth, Dots, and Nostril lines using a black Sharpie or marker. The pupil dots can be done with a white marker (optional).
5. The Heart can be cut with vinyl on Cricut (this step is optional).
6. Attach front and back together by stitching around the sides (except the bottom).

PURPLE

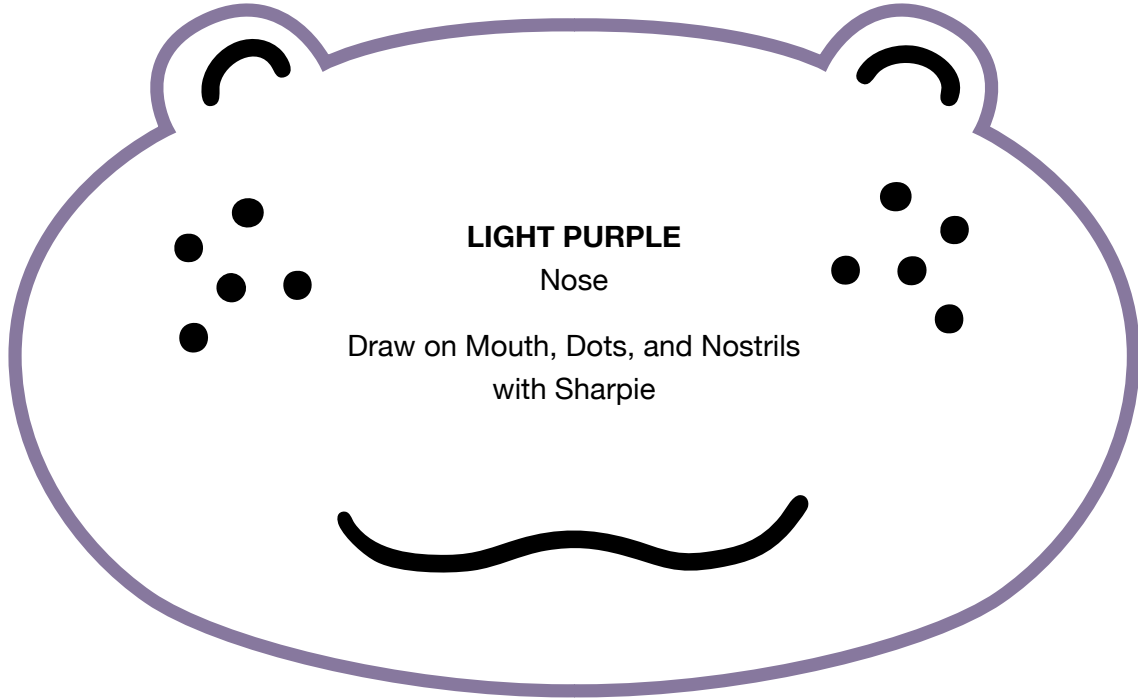

Cut 2 of these, Front and
Back of puppet

EXAMPLE

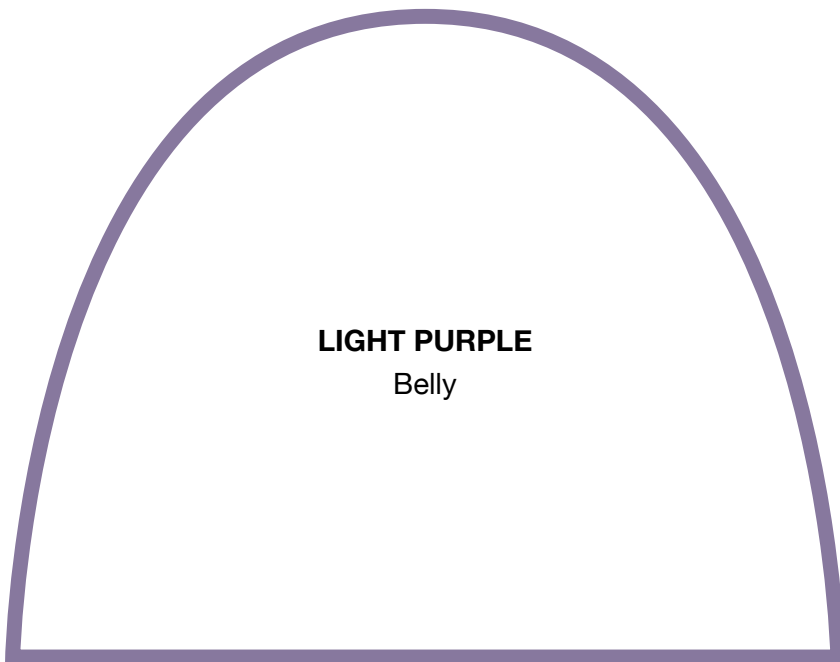

BLACK
Eyes

LIGHT PURPLE
Nose

Draw on Mouth, Dots, and Nostrils
with Sharpie
